Software developers in Montabaur, Germany created a novel Question and Answer app

Hello,

in April 2022 our novel question and answer app Amicido goes online - available for free download in the Google- and Apple stores. The novelty, and the idea of it, is that the user can choose one of eight predefined question types already when creating the question, in order to achieve a certain result. The question types in detail are:

Decision/Vote questions:

- Yes/No - Single choice from two preset options, yes and no
- Multiple Choice - Numerous selections of up to six options are possible
- One Choice - A single selection of up to six options is possible

Rating questions:

- Best Rating - Ratings of up to six options between 1 - 5 stars

Date/Organization questions:

- Best Date - Selection of up to six dates
- Block One - Reserve up to six options to block them out for others

Entertainment / Knowledge questions:

- Quiz - Define the correct answer with up to six options

Open questions:

- Free Reply - Requires the formulation of short essay answers or an upvote of existing answers

Posted questions are pushed to the community, friends, and possible group members on the QBoard (Question Board), Amicido's home page. If one is interested in a question and would like to answer it, one can open it to vote, post an answer, or comment.

So why is it worth becoming an Amicido member?! Amicido is a contemporary, and hopefully a fast-growing, community to share, support, and learn from each other. Using our different question types to achieve meaningful results and the best solution faster allows creativity to run wild. Browsing the QBoard can also be very inspiring, as it brings to light questions you've never been asked before.

We take precautions and don't track our members. Our only requirements to create an account are an email address and a freely selectable user name.

About Amicido

Amicido GmbH is a start-up company based in Montabaur, Rhineland-Palatinate, Germany. Founded in 2017, the company develops software. The main focus is on its' new Social Media Q&A App with the same name, "Amicido".
